```jsx
import React from 'react';
import {render, fireEvent} from '@testing-library/react';
import HiddenMessage from '../hidden-message';

test('shows the children when the checkbox is checked', () ⇒ {
  const testMessage = 'Test Message';
  const {queryByText, getByLabelText, getByText} = render(
    <HiddenMessage>{testMessage}</HiddenMessage>,
  );
  expect(queryByText(testMessage)).toBeNull();

  fireEvent.click(getByLabelText(/show/i));

  expect(getByText(testMessage)).toBeInTheDocument();
})
```
